**GovTech Industry Update**  
**Göttingen Corporate Finance**  
**June 12, 2020**

## Our Promise

---

# Göttingen Corporate Finance

We have a deep understanding of growth-oriented companies, having successfully executed numerous transactions in the past

We prioritize your interests and objectives:  
"the client comes first"

We are collaborative and partnership oriented

We have a direct line to key decision makers within the most relevant capital providers

We provide seamless advice and execution

We will seek to earn your trust every day with our transparent working and unbiased advice

GCF wants to be the partner that helps companies realise its true potential by finding the ideal investor which would be aligned in its strategic vision with your company

## Synopsis

---

### GovTech Industry Overview

- The GovTech industry witnessed sustained transaction activity in both M&A and fundraising spheres predominantly in North America
- As the demand for modern government software and technology offerings continues to grow, federal, state, and local entities are looking to improve the legacy system to improve efficiency, cover costs, and provide seamless service to their constituents
- Cloud-based software has continued to gain momentum in the public sector, driven by a combination of legal action and strategic development, forcing government officials to adopt solutions that can be configured for the workflow and providing greater interoperability across agencies
- Digital payments continue to be a highly lucrative sector of the government market as government-level citizen-and-business-to-government transactions expand, creating opportunities for integrated software vendors to create immediate and clear financial impact
- Citizen engagement and digital government experience are increasingly important in leaders and technology offices which encourages ongoing investment in software solutions that improve citizen engagement, security, transparency and service delivery
- The public sector market continues to attract interest from financial sponsors and strategic acquirers interested in investing in next-generation software solutions capable of modernizing government activities and services

**Government entities are increasingly looking for cloud-based platforms that can be deployed to replace the discriminatory legacy system, reduce organizational silos, and reduce operating costs**

## Key Transactions

### About the Target

Moovit is a Mobility-as-a-Service (MaaS) platform company best known for its mobile application that provides public transit and navigation data to simplify urban mobility in 3,100 cities around the world.

### The Transaction

In May 2020, Intel Corporation announced it has acquired Moovit, a mobility-as-a-service (MaaS) solutions company, for approximately \$900 million (\$840 million net of Intel Capital equity gain).

### Acquisition Highlights

The addition of Moovit brings Intel's Mobileye closer to achieving its plan to become a complete mobility provider, including robotaxi services, which is forecast to be an estimated \$160 billion opportunity by 2030. With this acquisition, Mobileye will be able to tap into Moovit's transit data repository of more than 7,500 key transit agencies and operators and improve the consumer experience for more than 800 million users worldwide.

### Management Quote

*"Moovit's massive global user base, proprietary transportation data, global editors community, strong partnerships with key transit and mobility ecosystem partners, and highly skilled team is what makes them a great investment,"*

- Amnon Shashua, CEO of Mobileye

### About the Target

UrbanFootprint is cloud-based Urban Intelligence software that delivers insight to government, enterprise, and academic institutions in urban planning, finance, mobility, sustainability, policy making, healthcare, and disaster preparedness.

### The Transaction

In February 2020, UrbanFootprint announced it has raised \$11.5m in Series A funding. The funding round was led by Valo Ventures with participation from Social Capital and new partner Radicle Impact.

### Funding Highlights

This funding will help UrbanFootprint improve platforms in transportation, master planning and urban design, artificial intelligence, and energy and mobility, and thus, help expand its offerings and increase the customer base of cities, urban planning and energy, Companies across the real estate sector.

### Management Quote

*"We invested in UrbanFootprint because their cloud-delivered software provides urban planners, corporations, policy makers, and local governments access to useful models of the built environment, with analytical tools and visualization to make data-informed decisions concerning environment impact, climate risk, property development, zoning, transportation, infrastructure, public spaces, and more, to improve the quality of life and return on investment"*

- Scott Tierney, Managing Partner at Valo Ventures

## GovTech Industry: M&A Transactions (1/3)

Date	Acquirer	Target	Target Country	Target Summary	Deal Value
09-Jun-20	E3 Federal Solutions (E3/Sentinel)	Lucid Perspectives	USA	Lucid Perspectives, a provider of software development and systems engineering solutions to the intelligence community.	N/A
18-May-20	Cognosante	Enterprise Information Services	USA	EIS is a mid-tier solutions integrator, providing Systems Engineering, Cyber Security, Information Technology, Biometrics, and Program Management Office services and solutions to the Federal Government	N/A
11-May-20	Ubicquia	CityIQ (A platform of GE Current)	USA	CityIQ is a smart city platform focused on traffic efficiency and public safety.	N/A
08-May-20	Intel Corp.	Moovit	Israel	Moovit is a Mobility-as-a-Service (MaaS) provider app. It simplifies urban mobility in +2700 cities all around the world, making getting around town via mass transit easier and more convenient.	\$900M
06-May-20	VertexOne	WaterSmart Software, Inc.	USA	WaterSmart Software, Inc. develops a software platform for statistical and quantitative analysis of water usage, and efficiency, as well as offers offers customized programs for water conservation recommendation by behavioral psychology, big data analytics, and cloud computing.	N/A
06-May-20	Intrepid Solutions and Services, LLC	Delta Solutions and Strategies, LLC	USA	Delta Solutions and Strategies, LLC provides decision-making consulting services. The Company offers technical assistance, engineering support, and advisory services for electronic, space, and missile systems.	N/A
06-May-20	Cotecna	Kaixin Certification	China	Kaixin Certification is a certification body in China approved by CNCA with accreditations from CNAS and ANAB.	N/A
23-Apr-20	Sino Hua-An International	MD Labs Sdn Bhd	Malaysia	MD Labs is an intelligence solutions provider in the field of data analytics and verticals solutions. MD Labs offers timely and accurate supply and demand data to the public and private sector in Malaysia.	\$6.2M
06-Apr-20	AEgis Technologies Group Inc.	Excivity Inc	USA	Excivity Inc provides computer security solutions. The Company offers cyber investigation, software development, protocol analysis, hardware designing, and training.	N/A

## GovTech Industry: M&A Transactions (2/3)

Date	Acquirer	Target	Target Country	Target Summary	Deal Value
06-Apr-20	OBI4wan B.V.	HowAboutYou B.V.	The Netherlands	HowAboutYou helps the public sector implement and embed capabilities in social networks, mobile applications, and open data.	N/A

## GovTech Industry: Recent developments (1/3)

Company	Recent Developments
	<p><b>ClearGov's New SaaS Tool Aims to Ease Budget Book Creation</b> "The Massachusetts startup has devised an online tool for local governments to draft, publish and automatically update their budgets in a way they hope is more user-friendly and accessible to citizens than the status quo. ClearGov built the product according to criteria from the Government Finance Officers Association, used every year for their Distinguished Budget Presentation Awards, so public officials aiming for that distinction can see GFOA's checklist in ClearGov's interface" <b>Source:</b> Government Technology <b>Date:</b> June 8, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/ClearGovs-New-SaaS-Tool-Aims-to-Ease-Budget-Book-Creation.html">https://www.govtech.com/biz/ClearGovs-New-SaaS-Tool-Aims-to-Ease-Budget-Book-Creation.html</a></p>
	<p><b>New AI Tool Lets Government Identify Objects from the Air</b> "The Australian company Nearmap, which also operates in the U.S., has accumulated a catalog of high-resolution aerial images for 90 million land parcels, and now it's applying AI to learn when property owners make changes. Nearmap AI is now available in the company's Mapbrowser tool, in the form of different layers atop regularly updated images catalogued by the platform. These layers can automatically identify and analyze ground features such as residential building footprints, construction sites, tree overhang, green cover, solar panels, trampolines and swimming pools, and detect changes over time" <b>Source:</b> Government Technology <b>Date:</b> June 5, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/New-AI-Tool-Lets-Government-Identify-Objects-from-the-Air.html">https://www.govtech.com/biz/New-AI-Tool-Lets-Government-Identify-Objects-from-the-Air.html</a></p>
	<p><b>Company Looks to Boost City Revenue With Water Meter Sensors</b> "Olea Edge Analytics, based in Austin, Texas, is putting various sensors on old water meters to flag when they're under-charging and need to be replaced. The results, say the company, can be big. The company's CEO, Dave Mackie, told Government Technology that Olea is focused solely on commercial meters for two reasons: they account for 40-80 percent of the city's total water revenue, and fixing them won't take money from private residents who can barely pay their bills as is" <b>Source:</b> Government Technology <b>Date:</b> May 19, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/Company-Looks-to-Boost-City-Revenue-With-Water-Meter-Sensors.html">https://www.govtech.com/biz/Company-Looks-to-Boost-City-Revenue-With-Water-Meter-Sensors.html</a></p>
	<p><b>CivicPlus Moves Into Low-Code Software for Digital Services</b> "The Kansas-based integrated communications software company announced its latest product, CivicOptimize, earlier this month. According to a news release, the centerpiece of CivicOptimize is a piece of low-code software called Productivity, with which government IT staff who have only a basic familiarity with hand-coding can build custom workflows, mobile applications and software integrations for digital services" <b>Source:</b> Government Technology <b>Date:</b> May 14, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/CivicPlus-Moves-Into-Low-Code-Software-for-Digital-Services.html">https://www.govtech.com/biz/CivicPlus-Moves-Into-Low-Code-Software-for-Digital-Services.html</a></p>

## GovTech Industry: Recent developments (2/3)

Company	Recent Developments
 GRANICUS	<p><b>Oklahoma Takes On Mass Unemployment Through New Platform</b> "As millions of Americans face the new reality of telework, furloughs or layoffs, and federal benefits start being released, state governments face a test of adaptability. More than 30 million people have filed for unemployment in the past six weeks, according to the U.S. Department of Labor, and states are on the hook to coordinate help. The state's secretary of digital information says Oklahoma is prepared to handle hundreds of thousands of claims and billions of state and federal dollars through Granicus' digital services platform" <b>Source:</b> Government Technology <b>Date:</b> May 6, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/Oklahoma-Takes-On-Mass-Unemployment-Through-New-Platform.html">https://www.govtech.com/biz/Oklahoma-Takes-On-Mass-Unemployment-Through-New-Platform.html</a></p>
 OPENGOV	<p><b>OpenGov Completes Cloud ERP Suite with Accounting Software</b> "Citing a growing need for cloud-based tools that can accommodate remote work, OpenGov unveiled the third software suite in its enterprise resource planning kit, this one focused on accounting for local government. With the launch of OpenGov Financials, the company says it has built a full-cloud ERP for the public sector, giving state and local governments a way to handle most ERP-related functions through cloud-hosted software-as-a-service instead of in person or through on-premises software" <b>Source:</b> Government Technology <b>Date:</b> April 28, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/OpenGov-Completes-Cloud-ERP-Suite-with-Accounting-Software.html">https://www.govtech.com/biz/OpenGov-Completes-Cloud-ERP-Suite-with-Accounting-Software.html</a></p>
 sensennetworks® Making Cities Smarter	<p><b>Las Vegas Awards Contract for Parking Enforcement Automation</b> "The city of Las Vegas has been angling for years to become a hub of innovation for new transportation companies and smart city technology. Toward that end, the city awarded a \$1.58-million contract to SenSen Networks, an Australian AI company that makes both hardware and software for analyzing occupancy or traffic, for instance at shopping centers, casino tables or parking structures. In the case of Las Vegas, starting this year, SenSen will deploy two pieces of hardware and 80 access keys to mobile software for automated parking and traffic enforcement" <b>Source:</b> Government Technology <b>Date:</b> April 23, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/Las-Vegas-Awards-Contract-for-Parking-Enforcement-Automation.html">https://www.govtech.com/biz/Las-Vegas-Awards-Contract-for-Parking-Enforcement-Automation.html</a></p>
 cityflag	<p><b>GovTech Startup Cityflag Reinvents Itself as Irlys</b> "The startup out of San Antonio gained enough clients and attention over the past few years that it felt a new name and mission statement were in order. It also announced two free tools for COVID-19 response. Founded in 2015 out of San Antonio, Cityflag has made its name working with municipalities to create apps for 311, citizen relationship management, community engagement and rental property maintenance requests" <b>Source:</b> Government Technology <b>Date:</b> April 13, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/Gov-Tech-Startup-Cityflag-Reinvents-Itself-as-Irlys.html">https://www.govtech.com/biz/Gov-Tech-Startup-Cityflag-Reinvents-Itself-as-Irlys.html</a></p>

## GovTech Industry: Recent developments (3/3)

Company	Recent Developments
	<p><b>SeamlessDocs Adds Payments to Digital Forms Software</b>            “SeamlessDocs, a company that helps government digitize and automate forms such as license applications and freedom of information requests, is now adding payment capabilities to its software. That means that governments will now be able to take payments from constituents digitally through the forms it creates using SeamlessDocs. The feature has been in beta mode, but as of today the company is making it available to all customers”  <b>Source:</b> Government Technology  <b>Date:</b> March 10, 2020  <b>Source Link:</b> <a href="https://www.govtech.com/biz/SeamlessDocs-Adds-Payments-to-Digital-Forms-Software.html">https://www.govtech.com/biz/SeamlessDocs-Adds-Payments-to-Digital-Forms-Software.html</a></p>
	<p><b>RoadBotics Adds Pavement Distress Identification to Software</b>            “About seven months after it announced \$7.5 million in new investment, Pittsburgh-based startup RoadBotics is adding new functions to its platform for planning road maintenance. The latest development from RoadBotics, announced earlier this month, is the ability of its pavement-assessment software to flag and catalogue roadway damage, or “distresses,” into specific categories: potholes, patches and sealed cracks, fatigue cracks, longitudinal and transverse cracks, pavement distortions and surface deterioration”  <b>Source:</b> Government Technology  <b>Date:</b> February 27, 2020  <b>Source Link:</b> <a href="https://www.govtech.com/biz/RoadBotics-Adds-Pavement-Distress-Identification-to-Software.html">https://www.govtech.com/biz/RoadBotics-Adds-Pavement-Distress-Identification-to-Software.html</a></p>
	<p><b>NIC Adds Mobile Passport Application and Renewal to Gov2Go</b>            “Since 2015, NIC Inc., one of the largest providers of digital government services in the United States, has been building out its mobile platform Gov2Go to make those services more convenient, from vehicle registration renewals to voter enrollment to tax reminders. Last week, they announced a new feature: expedited passport applications. Through a partnership with the Florida company RushMyPassport.com, NIC’s Gov2Go mobile app now offers to fast-track the issuing of passports within a window of three business days”  <b>Source:</b> Government Technology  <b>Date:</b> February 11, 2020  <b>Source Link:</b> <a href="https://www.govtech.com/biz/NIC-Adds-Mobile-Passport-Application-and-Renewal-to-Gov2Go.html">https://www.govtech.com/biz/NIC-Adds-Mobile-Passport-Application-and-Renewal-to-Gov2Go.html</a></p>
	<p><b>San Francisco Launches One-Stop Cannabis Application Portal</b>            “As more and more states legalize cannabis, local governments are finding themselves with a need to adapt their business permitting processes to complex and evolving regulatory laws. By working with the Chicago-based digital services company CityBase on a new online permitting portal, the joint city-county government of San Francisco wants to ensure the burden of figuring it out doesn’t fall to residents”  <b>Source:</b> Government Technology  <b>Date:</b> January 16, 2020  <b>Source Link:</b> <a href="https://www.govtech.com/biz/San-Francisco-Launches-One-Stop-Cannabis-Application-Portal.html">https://www.govtech.com/biz/San-Francisco-Launches-One-Stop-Cannabis-Application-Portal.html</a></p>

## GovTech Industry: Recent developments in COVID-19

Company	Recent Developments
 	<p><b>Peopletoo Ltd and Novoville Launch 'GetVolunteering' through TechForce19</b> "Peopletoo and Novoville have been selected to launch GetVolunteering, a volunteering app to support recruitment and retention of volunteers to support the fight against COVID-19 and harness the volunteering and community capacity into the future. This will enable local authorities to quickly identify volunteers in the local community to fill key roles in social care" <b>Source:</b> Peopletoo Limited <b>Date:</b> April 24, 2020 <b>Source Link:</b> <a href="https://www.peopletoo.co.uk/peopletoo-ltd-and-novoville-launch-getvolunteering-through-techforce19/">https://www.peopletoo.co.uk/peopletoo-ltd-and-novoville-launch-getvolunteering-through-techforce19/</a></p>
	<p><b>MIT, Apple, Google Build Apps to Trace COVID-19 Contact</b> "Along with Apple, Google and other entities around the world, the Massachusetts Institute of Technology is developing mobile software and an online tool for governments to trace and publicize COVID-19 cases. For the past few weeks, MIT has been promoting its new Safe Paths platform, consisting of a mobile application called Private Kit and a Web application, Safe Places" <b>Source:</b> Government Technology <b>Date:</b> April 21, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/health/MIT-Apple-Google-Build-Apps-to-Trace-COVID-19-Contact.html">https://www.govtech.com/health/MIT-Apple-Google-Build-Apps-to-Trace-COVID-19-Contact.html</a></p>
	<p><b>IBM Offers COBOL Help for Government to Deal with Crisis</b> "The COVID-19 outbreak, as well as the societal shutdowns that have followed, have thrust a lot of sudden changes onto state and local government. Right now, governments are navigating decades-old systems through an unprecedented crisis of demand. To help, IBM has started a three-pronged project to assist them in keeping COBOL-based systems up to speed" <b>Source:</b> Government Technology <b>Date:</b> April 13, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/IBM-Offers-COBOL-Help-for-Government-to-Deal-with-Crisis.html">https://www.govtech.com/biz/IBM-Offers-COBOL-Help-for-Government-to-Deal-with-Crisis.html</a></p>
	<p><b>Biobot Analytics to Track COVID-19 in Sewage Pro Bono</b> "The United States has more confirmed COVID-19 cases than any other nation, and experts predict the numbers will peak in April. The true scope of the pandemic will be difficult to gauge. Biobot Analytics, a startup that launched three years ago out of the Massachusetts Institute of Technology, is repurposing its wastewater testing technology to find coronavirus in sewers — and offering it practically for free to local government" <b>Source:</b> Government Technology <b>Date:</b> March 31, 2020 <b>Source Link:</b> <a href="https://www.govtech.com/biz/Biobot-Analytics-to-Track-COVID-19-in-Sewage-Pro-Bono.html">https://www.govtech.com/biz/Biobot-Analytics-to-Track-COVID-19-in-Sewage-Pro-Bono.html</a></p>
